Introduction

The City Engineer's Office is pleased to present the City of San Jacinto Capital Improvement Program (CIP).

The funded active CIP projects are divided into seven different sections specific to the type of project being included. The sections are STREETS, TRAFFIC, FACILITIES, PARKS & RECREATION, STORM DRAIN, WATER SERVICES, and SEWER. A section is also provided for those future projects, which are not fully planned or funded at this time, known as 'UNFUNDED wish list' projects.

Each section contains page(s), which represent the details of every CIP project. Pages are numbered to include a prefix letter corresponding to the name of each Section, such as 'S' for Streets, 'T' for Traffic, 'F' for Facilities, and so on. The details on the front side of each page include Project Title, Project Description, Project Number, Managing Department, Financial Requirements, Funding Allocation, Funding Sources and other related information. On the reverse side of each page, a general map of the City is provided with the specific project location as well as a photograph reference of the project. Each page in effect, becomes an '**Identification Card**' for every CIP project.

It is hoped that this "**CIP Book**" will serve as a **helpful reference** on the City's CIP projects, and a **useful tool** both for the City Council as well as Staff to monitor the current projects and to plan the future ones in the City of San Jacinto.

Sincerely,

Habib Motlagh
City Engineer
