Chapter 17.200 – Establishment of Zones, Adoption of Zoning Map

Sections:

- 17.200.010 – Purpose
- 17.200.020 – Zones Established
- 17.200.030 – Zoning Map Adopted
- 17.200.040 – Zoning of Annexed Areas and Undesignated Lands

17.200.010 – Purpose

This Chapter establishes the zones applied to property within the City; establishes and adopts the Zoning Map; and determines how the zones are depicted on the Zoning Map.

17.200.020 – Zones Established

The City of San Jacinto shall be divided into zones that are intended to implement and be consistent with the San Jacinto General Plan. Each parcel of land within the City shall be located within a zone identified on the City of San Jacinto Zoning Map. Table 2-1 identifies the zones established by this Development Code.

Table 2-1

17.200.030 – Zoning Map Adopted

The Council hereby adopts the City of San Jacinto Zoning Map (hereafter referred to as the "Zoning Map"), which is on file with the Department.

- A. Inclusion by reference.** The Zoning Map, together with all legends, symbols, notations, references, zone boundaries, and other information on the map, has been adopted by the Council and is hereby incorporated into this Development Code by reference as though it were fully included here.

- B. **Zone boundaries.** The Zoning Map shall indicate the boundaries of the zones established by Section 17.200.020 (Zones Established).
- C. **Relationship to General Plan.** The Zoning Map shall implement, and shall be consistent with, the City's adopted General Plan.
- D. **Map amendments.** The Zoning Map, if amended, shall be amended in compliance with the process established in Chapter 17.720 (Amendments).
- E. **Zoning Map interpretation, applicability of zone requirements.** The Zoning Map shall be interpreted in compliance with Section 17.105.020 (Rules of Interpretation).

17.200.040 – Zoning of Annexed Areas and Undesignated Lands

Property subject to annexation shall be classified (i.e., pre-zoned) in the zone(s) that are most consistent with the General Plan land use designation before commencement of Local Agency Formation Commission (LAFCO) proceedings in compliance with Government Code Section 56375 et seq. (Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000).

Chapter 17.205 – Allowable Land Uses and Development

Sections:

- 17.205.010 – Purpose
- 17.205.020 – General Requirements for Development and New Land Uses
- 17.205.030 – Allowable Land Uses and Permit Requirements
- 17.205.040 – Exemptions from Permit Requirements
- 17.205.050 – Additional Permits and Approvals
- 17.205.060 – Temporary Uses

17.205.010 – Purpose

This Chapter identifies requirements for the approval of proposed development and new land uses. The permit requirements for specific land uses are located in Chapter 17.215 through 17.235.

17.205.020 – General Requirements for Development and New Land Uses

No land use or structure shall be altered, constructed, established, moved, reconstructed, maintained, or replaced unless in compliance with the requirements in this Section.

- A. **Allowable use.** A land use shall be allowable in the zone applied to the site. The basis for determining whether a use is allowable is described in Section 17.205.030 (Allowable Land Uses and Permit Requirements).
- B. **Permit and approval requirements.** A planning permit or other approval or authorization required by Section 17.205.030 (Allowable Land Uses and Permit Requirements) and Chapter 17.325 – Water Efficient Landscape and Irrigation shall be obtained before the issuance of a required building permit, grading permit, or other construction related permit; other permits identified in the Municipal Code; and before the proposed use is constructed, otherwise established or put into operation, unless the proposed use is listed in Section 17.205.040 (Exemptions from Permit Requirements). (ord. 16-01, adopted April 5, 2016)
- C. **Development standards, conditions of approval.** Each land use and structure shall comply with the development standards of this Article 2; applicable standards and requirements in Article 3 (Site Planning and Development Standards), Article 4 (Standards for Specific Land Uses), and Article 5 (Resource Management); and any applicable conditions imposed by a previously approved or granted planning permit.

- D. Legal parcel.** The site of a proposed development or new land use shall be a parcel that was legally created in compliance with the Subdivision Map Act (Government Code Sections 66410 et seq.) and Municipal Code Title 16 (Subdivisions).

17.205.030 – Allowable Land Uses and Permit Requirements

- A. Allowable land uses.** The uses of land allowed in each zone are indicated in Chapters 17.215 through 17.235, including the type of planning permit, approval, or authorization required for each use. See Tables 2-2, 2-6, 2-8 & 2-10. Each land use is defined in Article 8 (Definitions).

1. Establishment of an allowable use.

- a. Any one or more land uses identified in the tables as being allowable within a specific zone may be established on any parcel within that zone. The land uses shall be subject to the planning permit requirements indicated in the tables as described in Paragraph B, below, and shall comply with all applicable requirements of this Development Code.
- b. Where a single parcel is proposed for development with two or more allowable land uses at the same time, the overall project shall be subject to the highest permit level required by Paragraph B for any individual use. For example, a food service establishment (i.e., restaurant) serving alcohol that is proposed in the CN (Commercial Neighborhood) zone would require approval of a Conditional Use Permit because Table 2-6 requires Conditional Use Permit approval for alcohol sales, even though a food service establishment is listed as a permitted use in the CN zone, requiring only a Zoning Clearance.

- 2. Use not listed.** A land use that is not listed in Tables 2-2, 2-6, 2-8 or 2-10 and is determined by the Director to not be included in Article 8 (Definitions) under the definition of a listed land use, is not allowed within the applicable zone, except as otherwise provided in Section 17.105.020.H (Rules of Interpretation – Unlisted Uses of Land) or Section 17.205.040 (Exemptions from Permit Requirements).

- B. Permit requirements.** Tables 2-2, 2-6, 2-8 and 2-10 within Chapters 17.215 through 17.235 provide for land uses that are:

1. Permitted subject to first obtaining a Zoning Clearance (Chapter 17.655) and compliance with all applicable provisions of this Development Code. These are shown as "P" uses in the tables.
 - a. Structures erected to accommodate any of the land use activities listed as permitted (P) shall require the approval of a Site Plan and Design Review in compliance with Chapter 17.630.

- b. Site Plan and Design Review approval shall be required before the issuance of a Building or Grading Permit for any new structure (not including fences or walls), and existing structures to be reconstructed or remodeled (including facade improvements) that increase the gross floor area by at least 25 percent or to increase structure height.
 - c. The applicable review authority shall be as specified in Section 17.630.030, Table 6-2 (Review Authority for Site Plan and Design Review).
2. Allowed subject to the approval of a Minor Use Permit (Chapter 17.605), and shown as "MUP" uses in the tables.
 3. Allowed subject to the approval of a Conditional Use Permit (Chapter 17.605), and shown as "CUP" uses in the tables.
 4. Allowed subject to the approval of a Home Occupation Permit (Chapter 17.615), and shown as "HOP" uses in the tables.
 5. Allowed subject to the approval of a Temporary Use Permit (Chapter 17.640), and shown as "TUP" uses in the tables.
 6. Expressly not allowed in particular zones, and shown as "---" in the tables.

17.205.040 – Exemptions from Permit Requirements

The planning permit requirements of this Development Code do not apply to the land uses, structures, and activities identified in this Section. These are allowed in all zones subject to compliance with this Section and Chapter 17.325 – Water Efficient Landscape and Irrigation. However, building, grading, encroachment, or other construction permits may still be required in compliance with the Municipal Code. (ord. 16-01, adopted April 5, 2016)

A. General requirements for exemption. The land uses, structures, and activities identified in Paragraph B, below, are exempt from the planning permit requirements of this Development Code except for the requirements of Chapter 17.325 – Water Efficient Landscape and Irrigation only when:

1. The use, activity, or structure is established and operated in compliance with the setback requirements, height limits, and all other applicable standards of this Article (Zones, Allowable Land Uses, and Zone-Specific Standards), and Article 3 (Site Planning and Development Standards), Article 4 (Standards for Specific Land Uses), Article 5 (Resource Management), and, where applicable, Chapter 17.705 (Nonconforming Parcels, Structures, and Uses); and
2. Any permit or approval required by regulations other than this Development Code is obtained (for example, a building permit) in compliance with Section

17.205.050 (Additional Permits and Approvals). (ord. 16-01, adopted April 5, 2016)

- B. Exempt activities and land uses.** The following are exempt from the planning permit requirements of this Development Code except for the requirement of Chapter 17.325 – Water Efficient Landscape and Irrigation when established and conducted in compliance with Paragraph A, above. (ord. 16-01, adopted April 5, 2016)
1. **Governmental facilities.** Facilities of State government, Federal government, or local government (e.g., water district, sanitation district) on land owned or leased by that governmental agency, for governmental operations, to the extent that the facilities are exempted by State or Federal law and in compliance with Section 17.100.060 (Applicability of Development Code).
 2. **Decks, platforms, and walkways.** Decks, platforms, and walkways that are not required to have a building permit or grading permit. Walkways shall be in compliance with Section 17.305.090 (Paving Within Residential Front Yard Area).
 3. **Fences and walls.** See Chapter 17.315 (Fences, Walls, and Hedges).
 4. **Interior remodeling.** Interior alterations that do not increase the gross floor area of the structure, or change the permitted use of the structure.
 5. **Repairs and maintenance.**
 - a. **Single-family dwellings.** Ordinary repairs to, and maintenance of, single-family dwellings, if any exterior repairs employ the same materials and design as the original construction.
 - b. **Multi-family residential structures and nonresidential structures.** Ordinary repairs to, and maintenance of multi-family residential structures and nonresidential structures, if:
 - (1) The work does not change the permitted land use of the site or structure, or add to, enlarge, or expand the land use or structure; and
 - (2) Any exterior repairs employ the same materials and design as the original construction.
 6. **Small, portable residential accessory structures.** A single portable structure per parcel or unit, including pre-manufactured storage sheds or other small structures, in residential zones that are exempt from building permit requirements in compliance with the Municipal Code and the Building Code.

Additional structures may be approved in compliance with Chapter 17.405 (Accessory Structures and Uses), where allowed by the applicable zone.

7. **Solar energy systems.** The addition or replacement of solar energy systems to the roof or side of a structure; provided that the systems comply with California Building Code and the provisions in Section 17.430.325 (Solar Energy Systems).
8. **Spas, hot tubs, and fish ponds.** Portable spas, hot tubs, and constructed fish ponds, and similar equipment and structures that do not: exceed 120 square feet in total area including related equipment; contain more than 2,000 gallons of water; or exceed three feet in depth.
9. **Utilities.** The alteration, construction, erection, or maintenance by a public utility or agency of utility infrastructure, subject to the provisions of Government Code Section 53090 et seq. (Regulation of Local Agencies by Counties and Cities), any local utility shall be allowed in any zone. See definition of "Utility Infrastructure" in Section 17.800.220 ("U" – Definitions). See Section 17.305.106 for utility undergrounding requirements.
10. **Satellite/dish and amateur radio antennae.** Satellite/dish and amateur radio antennae are exempt if in compliance with Section 17.430.290 (Satellite/Dish and Amateur Radio Antennae).

17.205.050 – Additional Permits and Approvals

A land use authorized through the approval of a Zoning Clearance, Minor Use Permit, or Conditional Use Permit may also require a building permit or other permit or approval required by the Municipal Code. Nothing contained in this Development Code, or any entitlement granted in compliance with this Development Code, shall serve to invalidate those other requirements.

17.205.060 – Temporary Uses

Requirements for establishing a temporary use (for example, a construction yard, seasonal sales lot, special event, temporary office trailer, etc.) are located in Chapter 17.640 (Temporary Use Permits).

– This page intentionally left blank –

Chapter 17.215 – Residential Zones

Sections:

- 17.215.010 – Purposes of Residential Zones
- 17.215.020 – Residential Zone Land Uses and Permit Requirements
- 17.215.030 – Residential Zone Development Standards
- 17.215.040 – Residential Zone Amenity Density Incentives

17.215.010 – Purposes of Residential Zones

The purposes of the individual residential zones and the manner in which they are applied are as follows:

- A. RE (Residential Estate) Zone.** The RE zone is applied to areas appropriate for detached single-family dwelling units with appropriate accessory structures and uses in semi-rural areas and areas where scenic and natural resources should be protected, together. The RE zone may also allow mobile and modular homes, accessory (second) dwelling units, agricultural uses, public facilities, and other uses that are compatible with rural estate single-family neighborhoods. Horses and other farm animals are also allowed in this zone in compliance with Section 17.430.050 (Animal Keeping). This zone allows a maximum density of 1.0 dwelling unit per two net acres of land. The RE zone is consistent with the Estate Residential (ER) land use designation of the General Plan.
- B. RR (Residential Rural) Zone.** The RR zone is applied to areas appropriate for detached single-family dwelling units with appropriate accessory structures and uses in a semi-rural setting. The RR zone may also allow mobile and modular homes, accessory (second) dwelling units, public facilities, and other uses that are compatible with rural single-family neighborhoods. Horses and other farm animals are also allowed in this zone in compliance with Section 17.430.050 (Animal Keeping). This zone allows a maximum density of 2.0 dwelling units per net acre of land. The RR zone is consistent with the Rural Residential (RR) land use designation of the General Plan.
- C. RL (Residential, Low Density) Zone.** The RL zone is applied to areas appropriate for a range of detached single-family residential dwellings on standard suburban parcels, together with appropriate accessory structures and uses. The RL zone may also allow mobile and modular homes, accessory (second) dwelling units, condominiums, townhomes, public facilities, and other uses that are compatible with low density single-family neighborhoods. This zone allows a density ranging from 2.1 to 5.0 dwelling units per net acre. The RL zone is consistent with the Low Density Residential (LDR) land use designation of the General Plan.

- D. RM (Residential, Medium Density) Zone.** The RM zone is applied to areas appropriate for neighborhoods with a variety of housing types located in proximity to parks, schools, and public services. The housing types range from attached and detached single-family residential dwelling units, duplexes, triplexes, fourplexes, condominiums, townhomes, mobile home parks, recreational vehicle parks, as well as accessory structures and uses. The RM zone may also allow limited neighborhood serving commercial uses on small appropriately located individual parcels or in small pedestrian-oriented neighborhood centers, public facilities, and other uses that are compatible with medium density neighborhoods. This zone allows a density ranging from 5.1 to 10.0 dwelling units per net acre. The RM zone is consistent with the Medium Density Residential (MDR) land use designation of the General Plan.
- E. RMH (Residential, Medium High Density) Zone.** The RMH zone is applied to areas appropriate for neighborhoods with a variety of multi-family attached housing types (for example, duplexes, triplexes, apartments, garden-style units, condominiums, townhomes, etc.), as well as accessory structures and uses primarily on larger parcels where site design can provide the desired mixture of housing types, aesthetic and functional open space areas, and other features that enhance the development and neighborhood. This zone allows a density ranging from 10.1 to 14.0 dwelling units per net acre. The RMH zone is consistent with the Medium High Density Residential (MHDR) land use designation of the General Plan.
- F. RH (Residential, High Density) Zone.** The RH zone is applied to areas appropriate for a variety of multi-family attached housing types (for example, apartments, garden style units, condominiums, townhomes, etc.), as well as accessory structures and uses primarily on larger parcels where site design can provide the desired mixture of housing types, aesthetic and functional open space areas, and other features that enhance the development and neighborhood. The RH zone may also allow limited neighborhood serving commercial uses on small appropriately located individual parcels or in small pedestrian-oriented neighborhood centers, public facilities, and other accessory structures and uses that are compatible with high density neighborhoods. This zone allows a density ranging from 14.1 to 18.0 dwelling units per net acre. The RH zone is consistent with the High Density Residential (HDR) land use designation of the General Plan.
- G. RVH (Residential, Very High Density) Zone.** The RVH zone is applied to areas appropriate for apartments, senior housing, and housing affordable to lower and moderate income families located near commercial areas and public services. The RVH zone may also allow limited neighborhood serving commercial uses on small appropriately located individual parcels or in small pedestrian-oriented neighborhood centers, public facilities, accessory structures and uses, and other uses that are compatible with high density neighborhoods. This zone allows a density ranging from 18.1 to 22.0 dwelling units per net acre. The RVH zone is consistent with the Very High Density Residential (VHDR) land use designation of the General Plan.

17.215.020 – Residential Zone Land Uses and Permit Requirements

A. Allowed land uses.

1. Table 2-2 indicates the uses allowed within each residential zone and the planning permit required to establish each use, in compliance with Article 6 (Permit Procedures).
2. Residential uses represent the principal allowed use, and only those additional uses that are complementary to, and can exist in harmony with, the residential character of each zone may be allowed as accessory, conditionally permitted, and/or temporary uses.

B. Prohibited land uses. Any table cell with a “---” means that the listed land use is expressly prohibited in that specific zone.

C. Land uses not listed. For land uses not listed in Table 2-2, the provisions of Chapter 17.105 (Interpretation of Regulations) shall apply.

D. Site Plan and Design Review required. All construction activities (e.g., additions, alterations, construction, reconstruction, or remodeling) shall require Site Plan, Design Review, and Water Efficient Landscape and Irrigation approval in compliance with Chapter 17.630 (Site Plan and Design Review) and Chapter 17.325 (Water Efficient Landscape and Irrigation). (ord. 16-01, adopted April 5, 2016)

E. Applicable Regulations. Where the last column in the tables (“Specific Use Regulations”) includes a Section number, the regulations in the referenced section apply to the use; however, provisions in other Sections of this Development Code may also apply.

Development Standards for RE, RR, and RL Zones**

Development Feature See Article 8 (Definitions)	RE	RR	RL 20,000	RL 15,000	RL 10,000	RL 7,200
Parcel Dimensions	<i>Minimum dimensions required for each newly created parcel. Parcel area shall be measured in terms of net area, as defined in Article 8 (Definitions).</i>					
Parcel Area (Net)	2 acres	20,000 sq. ft.	20,000 sq. ft.	15,000 sq. ft.	10,000 sq. ft.	7,200 sq. ft.
Parcel Width	150 ft.	100 ft.	Corner Parcel = 72 ft.		Interior Parcel = 60 ft.	
Parcel Depth	300 ft.	100 ft.	100 ft.	100 ft.	100 ft.	100 ft.
Density	One dwelling unit per parcel.		<i>Minimum and maximum number of dwelling units allowed per net acre. See Section 17.215.040 (Residential Zone Amenity Density Incentives). See "Area, Net" in Article 8 (Definitions).</i>			
			Minimum 2.1 dwelling units per net acre			
			Maximum 5.0 dwelling units per net acre			
Floor Area	<i>Minimum required interior floor area. See Chapter 17.425 (Single-Family Development) for compatibility standards that may require or allow a different minimum floor area.</i>					
	1,200 sq. ft.					1,000 sq. ft.
Setbacks	<i>Minimum required setbacks. See Section 17.305.120 for setback measurement, allowed projections into setbacks, and exceptions. See Article 4 for setback requirements applicable to specific land uses. Review Appendix 1 of the Landscape Design Guidelines for possible greater setback requirements on certain streets.</i>					
Front	25 ft.	25 ft.	20 ft.	20 ft.	20 ft.	20 ft.
Interior Side	5 ft.	5 ft.	5 ft.	5 ft.	5 ft.	5 ft.
Street Side	Primary Structure = 10 ft. and Detached Garage = 20 ft.					
Rear	20 ft.	20 ft.	20 ft.	20 ft.	20 ft.	20 ft.
Impervious Surface Coverage	<i>Maximum percentage of the total gross parcel area that may be covered by structures and impervious surfaces.</i>					
	50%	50%	50%	50%	50%	55%
Structure Coverage	<i>Maximum percentage of the total gross parcel area that may be covered by structures.</i>					
	35%	35%	35%	35%	35%	40%
Balconies, Second-Story for Detached Single Family Residences	<i>Second-Story Balconies shall maintain all other standards of the underlying zone and cannot be larger than 10% of the livable area of the residence. The Director may permit larger balconies when the privacy of the neighboring residences can be maintained pursuant Section 17.425.020 F 2 – Privacy Protection, due to larger lot sizes, balcony adjacency to General Plan designated Arterial Highways or larger, and/or balcony adjacency to non-sensitive open space areas. The Director has the discretion to provide notice to affected neighboring property owners before approving a balcony larger than 10% of the livable area of the residence.</i>					
Height	<i>Maximum allowable height of structures. See Section 17.305.060 for height measurement requirements and height limit exceptions.</i>					
Agricultural Structure	40 ft.	40 ft.	40 ft.	40 ft.	40 ft.	40 ft.
Primary Structure	35 ft.	35 ft.	35 ft.	35 ft.	35 ft.	35 ft.
Accessory Structure	15 ft.	15 ft.	15 ft.	15 ft.	15 ft.	15 ft.
Slope	Rear Setback Area = 3% maximum slope Rear Yard Area = 5% maximum slope with 20 ft. min depth					
Separation Distance	10 ft. minimum separation distance between primary and accessory structures.					
Accessory Structures	See Chapter 17.405 (Accessory Structures and Uses).					
Fences and Walls	See Chapter 17.315 (Fences, Walls, and Hedges).					
Landscaping	See Chapter 17.325 (Landscaping Standards).

17.215.040 – Residential Zone Amenity Density Incentives

This Section provides incentives, procedures, and standards for a proposed project to be developed up to the maximum density allowed in residential zones, except for RE (Residential Estate) and RR (Residential Rural) zones. The intent of the amenity density incentives is to encourage a compact urban form; encourage the redevelopment and renewal of blighted areas; provide incentives for infill development; encourage a density of development at or near to the maximum allowed; promote convenience; reduce travel distance; conserve energy and achieve high standards of design.

- A. Compliance with density thresholds.** The minimum and maximum density thresholds indicated in Tables 2-3 and 2-4 shall apply to development in residential zones. Development shall not be allowed at less than or more than the indicated density thresholds, except in the following instances:
- 1. Less than minimum density threshold.** A proposed project may be allowed at less than the applicable minimum density threshold only if the project complies with Chapter 17.645 (Transfer of Development Rights).
 - 2. Greater than maximum density threshold.** A proposed project may be allowed at greater than the applicable maximum density threshold only if the project complies with Chapter 17.310 (Affordable Housing – Density Bonuses).
- B. Allowed by right.** A proposed project shall be allowed by right at the applicable minimum density, subject to any permits required by Table 2-2 (Allowed Uses and Permit Requirements in Residential Zones).
- C. Allowed density up to maximum threshold.** A proposed project may be allowed at a density higher than the minimum, up to the maximum applicable density, if the proposed project:
- 1.** Obtains approval of a Site Plan and Design Review in compliance with Chapter 17.630 (Site Plan and Design Review), as modified in this Section; and
 - 2.** Provides the required amenities identified in Subsection D (Amenity Density Incentives), below.
- D. Amenity Density Incentives.** A proposed project in any residential zone, except the RE and RR zones, may qualify for an amenity density incentives (i.e., be allowed to develop up to the maximum applicable density threshold) by providing the amenities identified in Table 2-5 (Amenity Density Incentives for Projects in Residential Zones). The amount of the increased density shall not exceed the maximum of the density range stated for the specific zone. For the purposes of this Section, the term “amenity” shall be broadly defined to include natural features (e.g., trees, streams, green space, views, etc.) as well

as amenities for the benefit of the community (e.g., street furniture, child care space, community space, street awnings, etc.). An amenity shall not include cash or the provision of cash in lieu of a physical amenity. Where the applicant considers an amenity to be inappropriate, the review authority may approve waivers of the amenity density incentive requirement through the Site Plan and Design Review process (Chapter 17.630 – Site Plan and Design Review). A waiver shall only be granted when it is justified by clear and convincing evidence submitted by the applicant, in writing, to the review authority.

**Table 2-5
Amenity Density Incentives for Projects in Residential Zones**

Amenity	Incentive
Development is located within 1/2 mile of a shopping center and medical facilities	1 additional dwelling unit per acre
Development is located within 1/2 mile of public transportation or a shuttle service is provided	1 additional dwelling unit per acre
Development is located within 1/2 mile of public park	1 additional dwelling unit per acre
Development is part of a mixed-use project	1 additional dwelling unit per acre
Development exhibits a strong compatibility with adjacent land uses	1 additional dwelling unit per acre
Existing natural features (rock outcrops, mature trees, topography, etc.) are saved on-site and integrated into the development	1 additional dwelling unit per acre
An on-site professional management service is provided full-time	½ additional dwelling unit per acre
Active and passive solar energy concepts are used to lower energy costs to residents	½ additional dwelling unit per acre
Minimum open space requirement is exceeded by 25% or more	½ additional dwelling unit per acre
Day care services are provided on-site	½ additional dwelling unit per acre
(For developments in the RVH zone only): Development includes at least 50% of the units that are affordable to lower-income households	4 additional dwelling units per acre (i.e., 22 units/acre)
Other amenities that the applicant or the review authority propose	Subject to approval by the review authority

- E. Submittal requirements.** In addition to the submittal requirements in Chapter 17.630 (Site Plan and Design Review) and in Chapter 17.600 (Permit Application Filing and Processing), the Director may request additional information to properly evaluate the need, appropriateness, or impact of the proposed amenity density incentive and to permit a finding that the proposed incentive is justified and, if granted, would not negatively impact the public health, safety, or welfare.
- F. Approval of amenity density incentive.** An amenity density incentive may be approved, disapproved, conditionally approved, approved at a lower intensity or conditionally approved at a lower intensity.

17.215.050 – Group Homes for Persons with Disabilities

Notwithstanding any provision contained in this Development Code to the contrary, group homes for persons with disabilities shall be deemed a permitted use in all residential zone districts within the City. (Ord. 14-03, adopted May 6, 2014)

– This page intentionally left blank –

Chapter 17.220 – Commercial and Office Zones

Sections:

- 17.220.010 – Purposes of the Commercial and Office Zones
- 17.220.020 – Commercial and Office Zone Land Uses and Permit Requirements
- 17.220.030 – Commercial and Office Zone Development Standards

17.220.010 – Purposes of the Commercial and Office Zones

The purposes of the individual commercial zones and the manner in which they are applied are as follows:

- A. **CD (Commercial Downtown) Zone.** The CD zone is applied to the core of the downtown and is intended to accommodate a variety of commercial uses with a strong pedestrian orientation and design that enhances the City's small town character. The CD zone may also allow mixed nonresidential and residential development (with residential uses customarily located above nonresidential uses). This zone allows a maximum floor area ratio (FAR) of 2.0. The maximum allowable residential density for the residential component of a mixed-use project is 5.0 dwelling units per net acre. The CD zone is consistent with the Downtown Commercial land use designation of the General Plan.
- B. **CG (Commercial General) Zone.** The CG zone is applied to areas appropriate for general commercial and daily shopping needs of a broad market area. The CG zone may allow a wide range of retail sales and business, professional, and personal services that are accessible to transit corridors. This zone allows a maximum floor area ratio (FAR) of 0.40. The CG zone is consistent with the Community Commercial land use designation of the General Plan.
- C. **CN (Commercial Neighborhood) Zone.** The CN zone is applied to areas appropriate for providing small-scale retail and personal service uses for the local population living in adjacent residential neighborhoods. This zone allows a maximum floor area ratio (FAR) of 0.40. The CN zone is consistent with the Community Commercial land use designation of the General Plan.
- D. **CR (Commercial Regional) Zone.** The CR zone is applied to areas appropriate for large scale commercial development with retail, entertainment, and or service uses of a scale and function to serve a regional market. Uses allowed in the CR zone may include auto repair and sales, "big box" retail, factory outlets, hotels, and movie theaters. This zone allows a maximum floor area ratio (FAR) of 0.50. The CR zone is consistent with the Regional Commercial land use designation of the General Plan.

- E. Office Park (OP).** The OP zone is applied to areas appropriate for a variety of single-tenant and multi-tenant offices that include administrative, corporate, financial, general business, legal, medical, professional, research and development, and other supporting uses customarily situated on large parcels in a campus park like setting. Uses allowed in this zone may also include small convenience or service commercial activities intended to meet the needs of the onsite employee population. Other uses that are determined to be compatible with the primary uses may also be allowed. This zone allows a maximum floor area ratio (FAR) of 0.35. The OP zone is consistent with the Office Park land use designation of the General Plan.

17.220.020 – Commercial and Office Zone Land Uses and Permit Requirements

A. Allowed land uses.

1. Table 2-6 indicates the uses allowed within each commercial and office zone and the planning permit required to establish each use, in compliance with Article 6 (Planning Permit Procedures).
2. Commercial and office uses represent the principal allowed use, and only those additional uses that are complementary to, and can exist in harmony with, the character of each zone may be allowed as accessory, conditionally permitted, and/or temporary uses.

B. Prohibited land uses. Any table cell with a “---” means that the listed land use is expressly prohibited in that specific zone.

C. Land uses not listed. For land uses not listed in Table 2-6, the provisions of Chapter 17.105 (Interpretation of Regulations) shall apply.

D. Site Plan and Design Review required. All construction activities (e.g., additions, alterations, construction, reconstruction, or remodeling) shall require Site Plan, Design Review, and Water Efficient Landscape and Irrigation approval in compliance with Chapter 17.630 (Site Plan and Design Review) and 17.325 (Water Efficient Landscape and Irrigation). (ord. 16-01, adopted April 5, 2016)

E. Applicable Regulations. Where the last column in the tables (“Specific Use Regulations”) includes a Section number, the regulations in the referenced section apply to the use; however, provisions in other Sections of this Development Code may also apply.

17.220.030 – Commercial and Office Zone Development Standards

Subdivisions, new land uses and structures, and alterations to existing land uses and structures, shall be designed, constructed, and established in compliance with the requirements in Table 2-7, in addition to the standards and guidelines in Article 3 (Site Planning and Development Standards) (e.g., landscaping, parking and loading, signs, etc.), Article 4 (Standards for Specific Land Uses (e.g., outdoor display and sales, outdoor storage, etc.)), and Chapter 17.325 – Water Efficient Landscape and Irrigation. (ord. 16-01, adopted April 5, 2016)

– This area intentionally left blank –

**Table 2-7
Development Standards for Commercial and Office Zones**

Development Feature See Article 8 (Definitions)	CD	CN	CG	CR	OP
Parcel Dimensions	<i>Minimum dimensions required for each newly created parcel. Parcel area shall be measured in terms of net area, as defined in Article 8 (Definitions).</i>				
Parcel Area (Net)	3,500 sq. ft. min and 12,000 sq. ft. max	5,000 sq. ft.	5,000 sq. ft.	15 acres	5 acres
Parcel Width	50 ft.	50 ft.	50 ft.	500 ft.	300 ft.
Parcel Depth	70 ft.	100 ft.	100 ft.	250 ft.	250 ft.
Floor Area Ratio (FAR)	<i>Maximum floor area ratio (FAR) allowed per net acre. See "Area, Net" in Article 8 (Definitions).</i>				
Maximum FAR	2.0	.40	.40	.50	.35
Setbacks	<i>Minimum setbacks required. See Section 17.305.120 for setback measurement, allowed projections into setbacks, and exceptions. See Article 4 (Standards for Specific Land Uses) for setback requirements applicable to specific land uses. Review Appendix 1 of the Landscape Design Guidelines for possible greater setback requirements on certain streets.</i>				
Front	None allowed	15 ft.	10 ft.	15 ft.	15 ft.
Side (Interior)					
Abutting nonresidential	None allowed	None required	None required	30 ft.	30 ft.
Abutting residential	5 ft.	10 ft.	10 ft.	35 ft.	35 ft.
Side (Street)	None allowed	10 ft.	10 ft.	20 ft.	20 ft.
Rear					
Abutting nonresidential	None required	None required	None required	None required	25 ft.
Abutting residential	1 st floor = 5 ft.	15 ft.	15 ft.	35 ft.	35 ft.
	2 nd floor = 10 ft.				
Height	<i>Maximum allowable height of structures. See Section 17.305.060 for height measurement requirements and height limit exceptions.</i>				
Primary Structure	45 ft.	35 ft.	45 ft.	45 ft.	45 ft.
Accessory Structure	15 ft.	15 ft.	15 ft.	15 ft.	15 ft.
Impervious Surface Coverage	<i>Maximum percentage of the total gross parcel area that may be covered by structures and impervious surfaces.</i>				
	90%	80%	85%	90%	70%
Structure Coverage	<i>Maximum percentage of the total gross parcel area that may be covered by structures.</i>				
	90%	40%	50%	60%	40%
Accessory Structures	See Chapter 17.405 (Accessory Structures and Uses).				
Fences and Walls	See Chapter 17.315 (Fences, Walls, and Hedges).				
Landscaping	See Chapter 17.325 (Landscaping Standards).				
Parking	See Chapter 17.330 (Off-Street Parking and Loading Standards).

Chapter 17.225 – Industrial Zones

Sections:

- 17.225.010 – Purposes of the Industrial Zones
- 17.225.020 – Industrial Zone Land Uses and Permit Requirements
- 17.225.030 – Industrial Zone Development Standards

17.225.010 – Purposes of the Industrial Zones

The purposes of the individual industrial zones and the manner in which they are applied are as follows:

- A. BP (Business Park) Zone.** The BP zone is applied to areas appropriate for single-tenant and multi-tenant offices that include corporate headquarters, research and development, product development, and general business uses customarily situated on large parcels in a campus park like setting. Uses allowed in this zone may also include small convenience or service commercial activities intended to meet the needs of the onsite employee population. Other uses that are determined to be compatible with primary uses may also be allowed. This zone allows a maximum floor area ratio (FAR) of 0.35. The BP zone is consistent with the Business Park land use designation of the General Plan.
- B. IL (Industrial Light) Zone.** The IL zone is applied to areas appropriate for light industry and manufacturing and heavier commercial service-type uses whose proximity to major arterial highways is essential or desirable for their operation due to the large volumes of vehicle and truck traffic that they generate. Uses allowed in this zone may include auto repair services, pest control services, pool maintenance services, and woodworking shops. This zone allows a maximum floor area ratio (FAR) of 0.40. The IL zone is consistent with the Industrial land use designation of the General Plan.
- C. IH (Industrial Heavy) Zone.** The IH zone is applied to areas appropriate for a variety of low polluting and nonpolluting industrial and manufacturing activities, including limited regional and subregional commercial activities that are nonpolluting and can coexist compatibly with surrounding land uses. Uses allowed in this zone may include research and development; manufacturing and processing; large single-tenant distribution and sales; boat, recreational vehicle, and truck sales, leasing and repair; offices; warehousing and indoor storage; and high technology production. Other uses that are determined to be compatible with primary uses may also be allowed. This zone allows a maximum floor area ratio (FAR) of 0.40. The IH zone is compatible with the Industrial land use designation of the General Plan.

17.225.020 – Industrial Zone Land Uses and Permit Requirements

A. Allowed land uses.

1. Table 2-8 indicates the uses allowed within each industrial zone and the planning permit required to establish each use, in compliance with Article 6 (Planning Permit Procedures).
2. Industrial uses represent the principal allowed use, and only those additional uses that are complementary to, and can exist in harmony with, the character of each zone may be allowed as accessory, conditionally permitted, and/or temporary uses.

B. Prohibited land uses. Any table cell with a “---” means that the listed land use is expressly prohibited in that specific zone.

C. Land uses not listed. For land uses not listed in Table 2-8, the provisions of Chapter 17.105. (Interpretation) shall apply.

D. Site Plan and Design Review required. All construction activities (e.g., additions, alterations, construction, reconstruction, or remodeling) shall require Site Plan, Design Review, and Water Efficient Landscape and Irrigation approval in compliance with Chapter 17.630 (Site Plan and Design Review) and Chapter 17.325 (Water Efficient Landscape and Irrigation). (ord. 16-01, adopted April 5, 2016)

E. Applicable Regulations. Where the last column in the tables (“Specific Use Regulations”) includes a Section number, the regulations in the referenced section apply to the use; however, provisions in other Sections of this Development Code may also apply.

17.225.030 – Industrial Zone Development Standards

Subdivisions, new land uses and structures, and alterations to existing land uses and structures, shall be designed, constructed, and established in compliance with the requirements in Table 2-9, in addition to the standards and guidelines in Article 3 (Site Planning and Development Standards) (e.g., landscaping, parking and loading, signs, etc.), Article 4 (Standards for Specific Land Uses (e.g., outdoor storage, etc.)), and Chapter 17.325 – Water Efficient Landscape and Irrigation. (ord. 16-01, adopted April 5, 2016)

- This area intentionally left blank. -

**Table 2-9
Development Standards for Industrial Zones**

Development Feature See Article 8 (Definitions)	BP	IL	IH
Parcel Dimensions	<i>Minimum dimensions required for each newly created parcel. Parcel area shall be measured in terms of net area, as defined in Article 8 (Definitions).</i>		
Parcel Area (Net)	5 acres	No minimum	No minimum
Parcel Width	300 ft.	50 ft.	150 ft.
Parcel Depth	200 ft.	200 ft.	200 ft.
Floor Area Ratio	<i>Maximum floor area ratio (FAR) allowed per net acre. See "Area, Net" in Article 8 (Definitions).</i>		
	.35	.40	.40
Setbacks	<i>Minimum setbacks required. See Section 17.305.120 for setback measurement, allowed projections into setbacks, and exceptions. See Article 4 for setback requirements applicable to specific land uses. See Article 8 for definitions of "Abutting" and "Adjacent". Review Appendix 1 of the Landscape Design Guidelines for possible greater setback requirements on certain streets.</i>		
Front			
Adjacent to nonresidential	10 ft.	10 ft.	15 ft.
Adjacent to residential	25 ft.	50 ft.	50 ft.
Side (Interior)			
Abutting nonresidential	10 ft.	10 ft.	10 ft.
Abutting residential	35 ft.	35 ft.	50 ft.
Side (Street)			
Adjacent to nonresidential	20 ft.	20 ft.	20 ft.
Adjacent to residential	25 ft.	25 ft.	50 ft.
Rear			
Abutting nonresidential	25 ft.	None	None
Abutting residential	35 ft.	15 ft.	75 ft.
Impervious Surface Coverage	<i>Maximum percentage of the total gross parcel area that may be covered by structures and impervious surfaces.</i>		
	70%	80%	85%
Structure Coverage	<i>Maximum percentage of the total gross parcel area that may be covered by structures.</i>		
	40%	65%	70%
Height	<i>Maximum allowable height of structures. See Chapter 17.305.060 for height measurement requirements and height limit exceptions.</i>		
Primary Structure	45 ft.	45 ft.	60 ft.
Accessory Structure	15 ft.	15 ft.	15 ft.
Accessory Structures	See Chapter 17.405 (Accessory Structures and Uses).		
Fences and Walls	See Chapter 17.315 (Fences, Walls, and Hedges).		
Landscaping	See Chapter 17.325 (Landscaping Standards).		
Parking	See Chapter 17.330 (Off-Street Parking and Loading Standards).		
Satellite/Dish Antennae	See Section 17.430.290 (Satellite/Dish Antenna and Amateur Radio Facilities).		
Signs	See Chapter 17.335 (Sign Standards).		

Chapter 17.230 – Special Purpose Zones

Sections:

- 17.230.010 – Purposes of the Special Purpose Zones
- 17.230.020 – Special Purpose Zone Land Uses and Permit Requirements
- 17.230.030 – Special Purpose Zone Development Standards

17.230.010 – Purposes of the Special Purpose Zones

The purposes of the individual special purpose zones and the manner in which they are applied are as follows:

- A. Open Space General (OSG) Zone.** The OSG zone is applied to areas appropriate for passive recreational activities and conservation of natural and scenic resources. Uses may include hiking, biking and equestrian trails; outdoor recreation; and extremely low density single-family dwellings. The maximum allowable residential density is 1.0 dwelling unit per 40 net acres. This zone allows maximum floor area ratio (FAR) of 0.10. The OSG zone is consistent with the General Open Space land use designation of the General Plan.
- B. Open Space Recreation (OSR) Zone.** The OSR zone is applied to areas appropriate for public or private, active or passive outdoor recreational facilities and accessory indoor facilities. Uses may include equestrian clubs, golf courses, swimming schools, tennis clubs, and areas for active sports play (e.g., large multipurpose fields for community events and informal recreation, sports fields and courts, concessions, tot lots, picnic areas, support facilities, caretaker facilities, etc.). This zone allows a maximum floor area ratio (FAR) of 0.15. The OSR zone is consistent with the Open Space Recreation and with the Parks land use designations of the General Plan.
- C. Public Institutional (PI) Zone.** The PI zone is applied to areas appropriate for publicly-owned facilities and properties, including the Eastern Municipal Water District properties. Uses may include City administrative offices and office complexes, community centers, fire stations, police stations, schools, utility substations, and water facilities. Other uses that are determined to be compatible with primary uses may also be allowed. This zone allows a maximum floor area ratio (FAR) of 0.50. The PI zone is consistent with the Public Institutional land use designation of the General Plan.
- D. Specific Plan (SP) Zone.** The SP zone is applied to areas appropriate for all projects of 100 acres or more in size as well as areas that are designated as Specific Plan on the General Plan, both of which warrant a comprehensive set of land use policies and standards designed for the unique features of an area within specific project boundaries.

A specific plan shall be prepared in compliance with Government Code Sections 65450 et seq. and shall include detailed conditions, programs, and regulations that address specific site constraints and opportunities, including buffering, traffic, noise, and other land use compatibility impacts. Allowed densities and uses are based on the underlying General Plan designation per parcel or, in the absence of a designation, the densities and uses identified in the Specific Plan. The SP zone is consistent with the Specific Plan land use designation of the General Plan.

17.230.020 – Special Purpose Zone Land Uses and Permit Requirements

A. Allowed land uses.

1. Table 2-10 indicates the uses allowed within each special purpose zone and the planning permit required to establish each use, in compliance with Article 6 (Planning Permit Procedures).
2. Recreational uses, open space uses, and public facility uses and accessory support uses represent the principal allowed uses, and only those additional uses that are complementary to, and can exist in harmony with, the character of each zone may be allowed as accessory, conditionally permitted, and/or temporary uses.

B. Prohibited land uses. Any table cell with a “---” means that the listed land use is expressly prohibited in that specific zone.

C. Land uses not listed. For land uses not listed in Table 2-10, the provisions of Chapter 17.105 (Interpretation) shall apply.

D. Site Plan and Design Review required. All construction activities (e.g., additions, alterations, construction, reconstruction, or remodeling) shall require Site Plan, Design Review, and Water Efficient Landscape and Irrigation approval in compliance with Chapter 17.630 (Site Plan and Design Review) and Chapter 17.325 (Water Efficient Landscape and Irrigation). (ord. 16-01, adopted April 5, 2016)

E. Applicable Regulations. Where the last column in the tables (“Specific Use Regulations”) includes a Section number, the regulations in the referenced section apply to the use; however, provisions in other Sections of this Development Code may also apply.

17.230.030 – Special Purpose Zone Development Standards

New land uses and structures, and alterations to existing uses or structures shall be designed, constructed, and/or established in compliance with the requirements in Table 2-11 (Development Standards for Special Purpose Zones), in addition to the general development standards and guidelines (e.g., landscaping, parking and loading, etc.) in Article 3 (Site Planning and Development Standards), Article 4 (Standards for Specific Land Uses (e.g., accessory structures, etc.)), and Chapter 17.325 (Water Efficient Landscape and Irrigation). (ord. 16-01, adopted April 5, 2016)

Table 2-11
Development Standards for Special Purpose Zones

Development Feature	OSG	OSR	PI
Minimum Parcel Area	N/A	N/A	N/A
Maximum Floor Area Ratio (FAR)	.10	.15	.50
Maximum Density	<i>Minimum and maximum number of dwelling units allowed per net acre. See "Area, Net" in Article 8 (Definitions).</i>		
	1 dwelling unit per 40 net acres	N/A	N/A
Setbacks	<i>The minimum front, side and rear setbacks required shall be equal to those required in the most restrictive abutting zone. The review authority may modify the setbacks when it is found to be necessary to maintain the purpose of the zone. Review Appendix 1 of the Landscape Design Guidelines for possible greater setback requirements on certain streets.</i>		
Maximum Height	<i>The maximum height of a structure shall be equal to that required in the most restrictive abutting zone. The review authority may allow higher structures when it is found to be necessary to maintain the purpose of the zone.</i>		
Accessory Structures	See Chapter 17.405 (Accessory Structures and Uses).		
Fences and Walls	See Chapter 17.315 (Fences, Walls, and Hedges).		
Landscaping	See Chapter 17.325 (Landscaping Standards).		
Parking	See Chapter 17.330 (Off-Street Parking and Loading Standards).		
Satellite Antenna	See Section 17.430.290 (Satellite/Dish Antennas and Amateur Radio Facilities).		
Signs	See Chapter 17.335 (Sign Standards).		

Chapter 17.235 – Combining/Overlay Zones

Sections:

- 17.235.010 – Purposes of the Combining/Overlay Zones
- 17.235.020 – Applicability of Combining/Overlay Zone Provisions
- 17.235.030 – Residential Agricultural Accessory Business (-RAAB)
Combining/Overlay Zone
- 17.235.040 – Urban Corridor (-UC) Combining/Overlay Zone

17.235.010 – Purposes of the Combining/Overlay Zones

This Chapter provides regulations for development and new land uses in the combining/overlay zones established by Section 17.20.020 (Zones Established). The combining/overlay zones are intended to provide guidance for development and new land uses in addition to the standards and regulations of the primary zones, where important site, neighborhood, economic development, or compatibility issues require particular attention in project planning.

17.235.020 – Applicability of Combining/Overlay Zone Provisions

- A. Mapping of combining/overlay zones.** The symbols for combining/overlay zones in Section 17.200.020 (Zones Established) shall be used on the Zoning Map to indicate the applicability of combining/overlay zones to specific sites. Each combining/overlay symbol shall be appended as a suffix to the symbol for the primary zone on the Zoning Map. For example, CG-UC represents an Urban Corridor Overlay Zone in the Commercial General Zone.
- B. Allowed land uses.** A land use normally allowed in the primary zone shall be allowed within a combining/overlay zone subject to any additional requirements of the combining/overlay zone, unless otherwise provided in a specific combining/overlay zone.
- C. Permit requirements.** Development and new land uses within a combining/overlay zone shall obtain the planning permits required for the primary zone, unless otherwise provided in a specific combining/overlay zone.
- D. Development standards.** Development and new land uses within a combining/overlay zone shall comply with all applicable requirements of the primary zone, unless otherwise provided in a specific combining/overlay zone.

- E. **Conflict between standards and regulations.** In the event of a conflict between the provisions of this Section and any other provision of this Development Code, this Section shall control.

**17.235.030 – Residential Agricultural Accessory Business (-RAAB)
Combining/Overlay Zone**

- A. **Purpose.** The -RAAB combining/overlay zone is applied to various areas of the City that have both low-density residential uses and low-intensity nonresidential uses. The intent is to establish standards that allow the continued and expanded use and operation of the low-intensity nonresidential uses and that will ensure the compatibility of these uses with low-density residential uses. The -RAAB combining/overlay zone is consistent with the Rural Residential and Low Density Residential land use designation in the General Plan.
- B. **Applicability.** The -RAAB overlay may be applied only to properties in the RR (Rural Residential) and RL (Low-Density Residential) zones.
- C. **Allowed uses.** In addition to the uses allowed in the RR (Rural Residential) and RL (Low-Density Residential) zones in compliance with Table 2-2 (Allowed Uses and Permit Requirements in Residential Zones), cottage businesses shall also be allowed within the -RAAB combining/overlay zone.
- D. **Development standards.** All cottage business shall be located, developed, and operated in compliance with Section 17.430.150 (Cottage Businesses).

17.235.040 – Urban Corridor (-UC) Combining/Overlay Zone

- A. **Purpose.** The -UC combining/overlay zone is applied to various zones along the major urban corridors of the City. The intent is to establish community design principles and standards that promote land use compatibility among the diverse zones situated along the corridors. The corridors are important to the City in projecting a positive image of the community while also enhancing the quality of life for the users and occupants. The -UC combining/overlay zone is consistent with all land use designations in the General Plan.
- B. **Applicability.** The provisions of this Section shall apply to all activities (e.g., additions, alterations, new construction, reconstruction, redevelopment, remodeling, site modification, etc.) within the -UC combining/overlay zone that require approval of a Site Plan and Design Review in compliance with Chapter 17.630 (Site Plan and Design Review) and Water Efficient Landscape and Irrigation approval per Chapter 17.325 – Water Efficient Landscape and Irrigation. If there is a perceived conflict between the provisions of this Section and those of the underlying zone, the provisions of this Section shall prevail. (ord. 16-01, adopted April 5, 2016)

- C. Allowed uses.** The uses allowed within the -UC combining/overlay zone shall be the same as those of the underlying zone, unless modified by this Section, except that in the BP, IL, and IH zones, hotels, motels, hospitals, convalescent hospitals, and child day care facilities shall not be allowed on the same parcel as industrial uses without a Conditional Use Permit approved in compliance with Chapter 17.605 (Conditional Use Permits and Minor Use Permits).
- D. Site planning and design guidelines and standards.**
- 1. Compatibility with adjacent sites.** The proposed development shall be compatible with the landscape elements, structures, and uses of adjacent sites.
 - 2. Location and orientation of structures.**
 - a. On sites with multiple structures and uses, commercial structures and uses shall face the street with office-professional structures and uses or industrial structures and uses located to the rear of the site. If the structures and uses are office-professional and industrial, the office-professional structures and uses shall face the street.
 - 3. Pedestrian circulation.**
 - a. Walkways shall be provided from the public sidewalk to the structure entrances. Pedestrian circulation and pedestrian amenities should be emphasized in all site plan proposals. Covered walkways along and between structures may be utilized.
 - b. Public sidewalks shall receive special decorative paving accents where crossed by driveway entrances to parking lots.
 - 4. Parking and circulation.**
 - a. Corner properties shall provide vehicular access from the adjacent street with the lesser traffic category and avoid driveway openings on the major street, where feasible.
 - b. Shared driveways shall be developed, where feasible, to reduce the traffic conflict points on adjacent roadways. When no development exists on adjacent property, the site plan should give consideration to its future development and address how the two sites may develop common access and circulation.
 - c. Parking shall be used as a buffer between diverse land uses where possible, either on-site or off-site.

- d. Off-street parking areas visible from public streets shall be screened from view with a minimum 30-inch high solid wall or landscaped hedge. Screens shall not exceed 42 inches in height within required front or side setbacks.
- e. Landscaping shall be dispersed evenly throughout the parking area. Landscape islands that are a minimum of five feet wide shall be located between every 10 parking stalls. The choice of trees should consider the goal of shading 50 percent of the paved surface within five years.

E. Architectural design guidelines.

1. **Industrial adjacent to residential.** Where industrial uses abut property zoned for residential uses, no window or door openings in the structure(s) shall face a residentially-zoned property.
2. **Architectural design.**
 - a. Where an urban corridor has a recognizable architectural theme, style, or character, it shall be considered for incorporation into the project's design. Where possible, the design should respect the City's architectural heritage.
 - b. Corner structures may provide vertical elements (e.g., towers).
3. **Structure scale and height.**
 - a. Where appropriate, efforts to coordinate with the architecture and the height of adjacent structures are encouraged, particularly where structures are located very close together. Similar design linkages can be achieved by placing window lines, belt courses, or other horizontal elements in a pattern that reflects the same elements in neighboring structures.
 - b. All sides of a structure shall receive enhanced architectural treatment.
 - c. Structures over two stories in height shall step back the upper story street-facing facades to reduce apparent height and bulk. The step-back shall be at least 10 feet in depth.
 - d. Elevations of structures over 50 feet wide shall divide their elevations into smaller parts by utilizing a change of plane, projection, or recess. Large or long continuous blank wall planes shall be avoided.

4. **Entrances.**
 - a. Entries shall be emphasized by the use of canopies, arches, and columns; a change in roofline; or other architectural feature.
 - b. Commercial and office/professional structures with long frontages shall provide frequent entrances along the street, when feasible. Entrances from parking areas should always be accompanied by a front street-facing entrance.
5. **Windows.** Structures shall provide generous openings at ground level to allow views of display windows by pedestrians and passing traffic, as well as visual access for emergency personnel. Opaque and reflecting glass shall not be used.
